Our Reach

Who We Are

Founded in 1988, A-S Medications Solutions is the Nation's Industry Leader in Point-Of-Care Dispensing serving nearly 4,000 sites impacting millions of lives. ASM is fully capable as a wholesale operation and repack manufacturer.

- Point of Care Dispensing
- Full Pharmacy Services
- Mail Order Pharmacy
- Innovative Pricing Programs

Credentials

- Licensed Distributor – Nebraska/Illinois- Serving all 50 States, Guam & Puerto Rico
- Registered with the FDA and DEA
- NABP/VAWD Certified
- Member of the Healthcare Distribution Alliance (HDA)

The Challenge: Quality and Adherence Beyond the Pharmacy

CMS Quality Metrics

ACOs must consistently meet rigorous quality benchmarks across multiple domains including patient experience, care coordination, and preventive health measures.

Medication Adherence Gaps

Non-adherence costs the healthcare system \$290 billion annually and remains a critical barrier to achieving improved patient outcomes and shared savings targets.

Care Coordination Complexity

Managing timely, coordinated care for Medicare populations while reducing unnecessary costs and hospital readmissions requires integrated, efficient workflows.

Our Solution: Point of Care Dispensing + Prepackaged Medications

Point of Care Dispensing

Provides patients their prescriptions directly during office visits, eliminating trips to external pharmacies and ensuring immediate medication initiation.

- Real-time medication access
- Enhanced provider oversight
- Reduced prescription abandonment

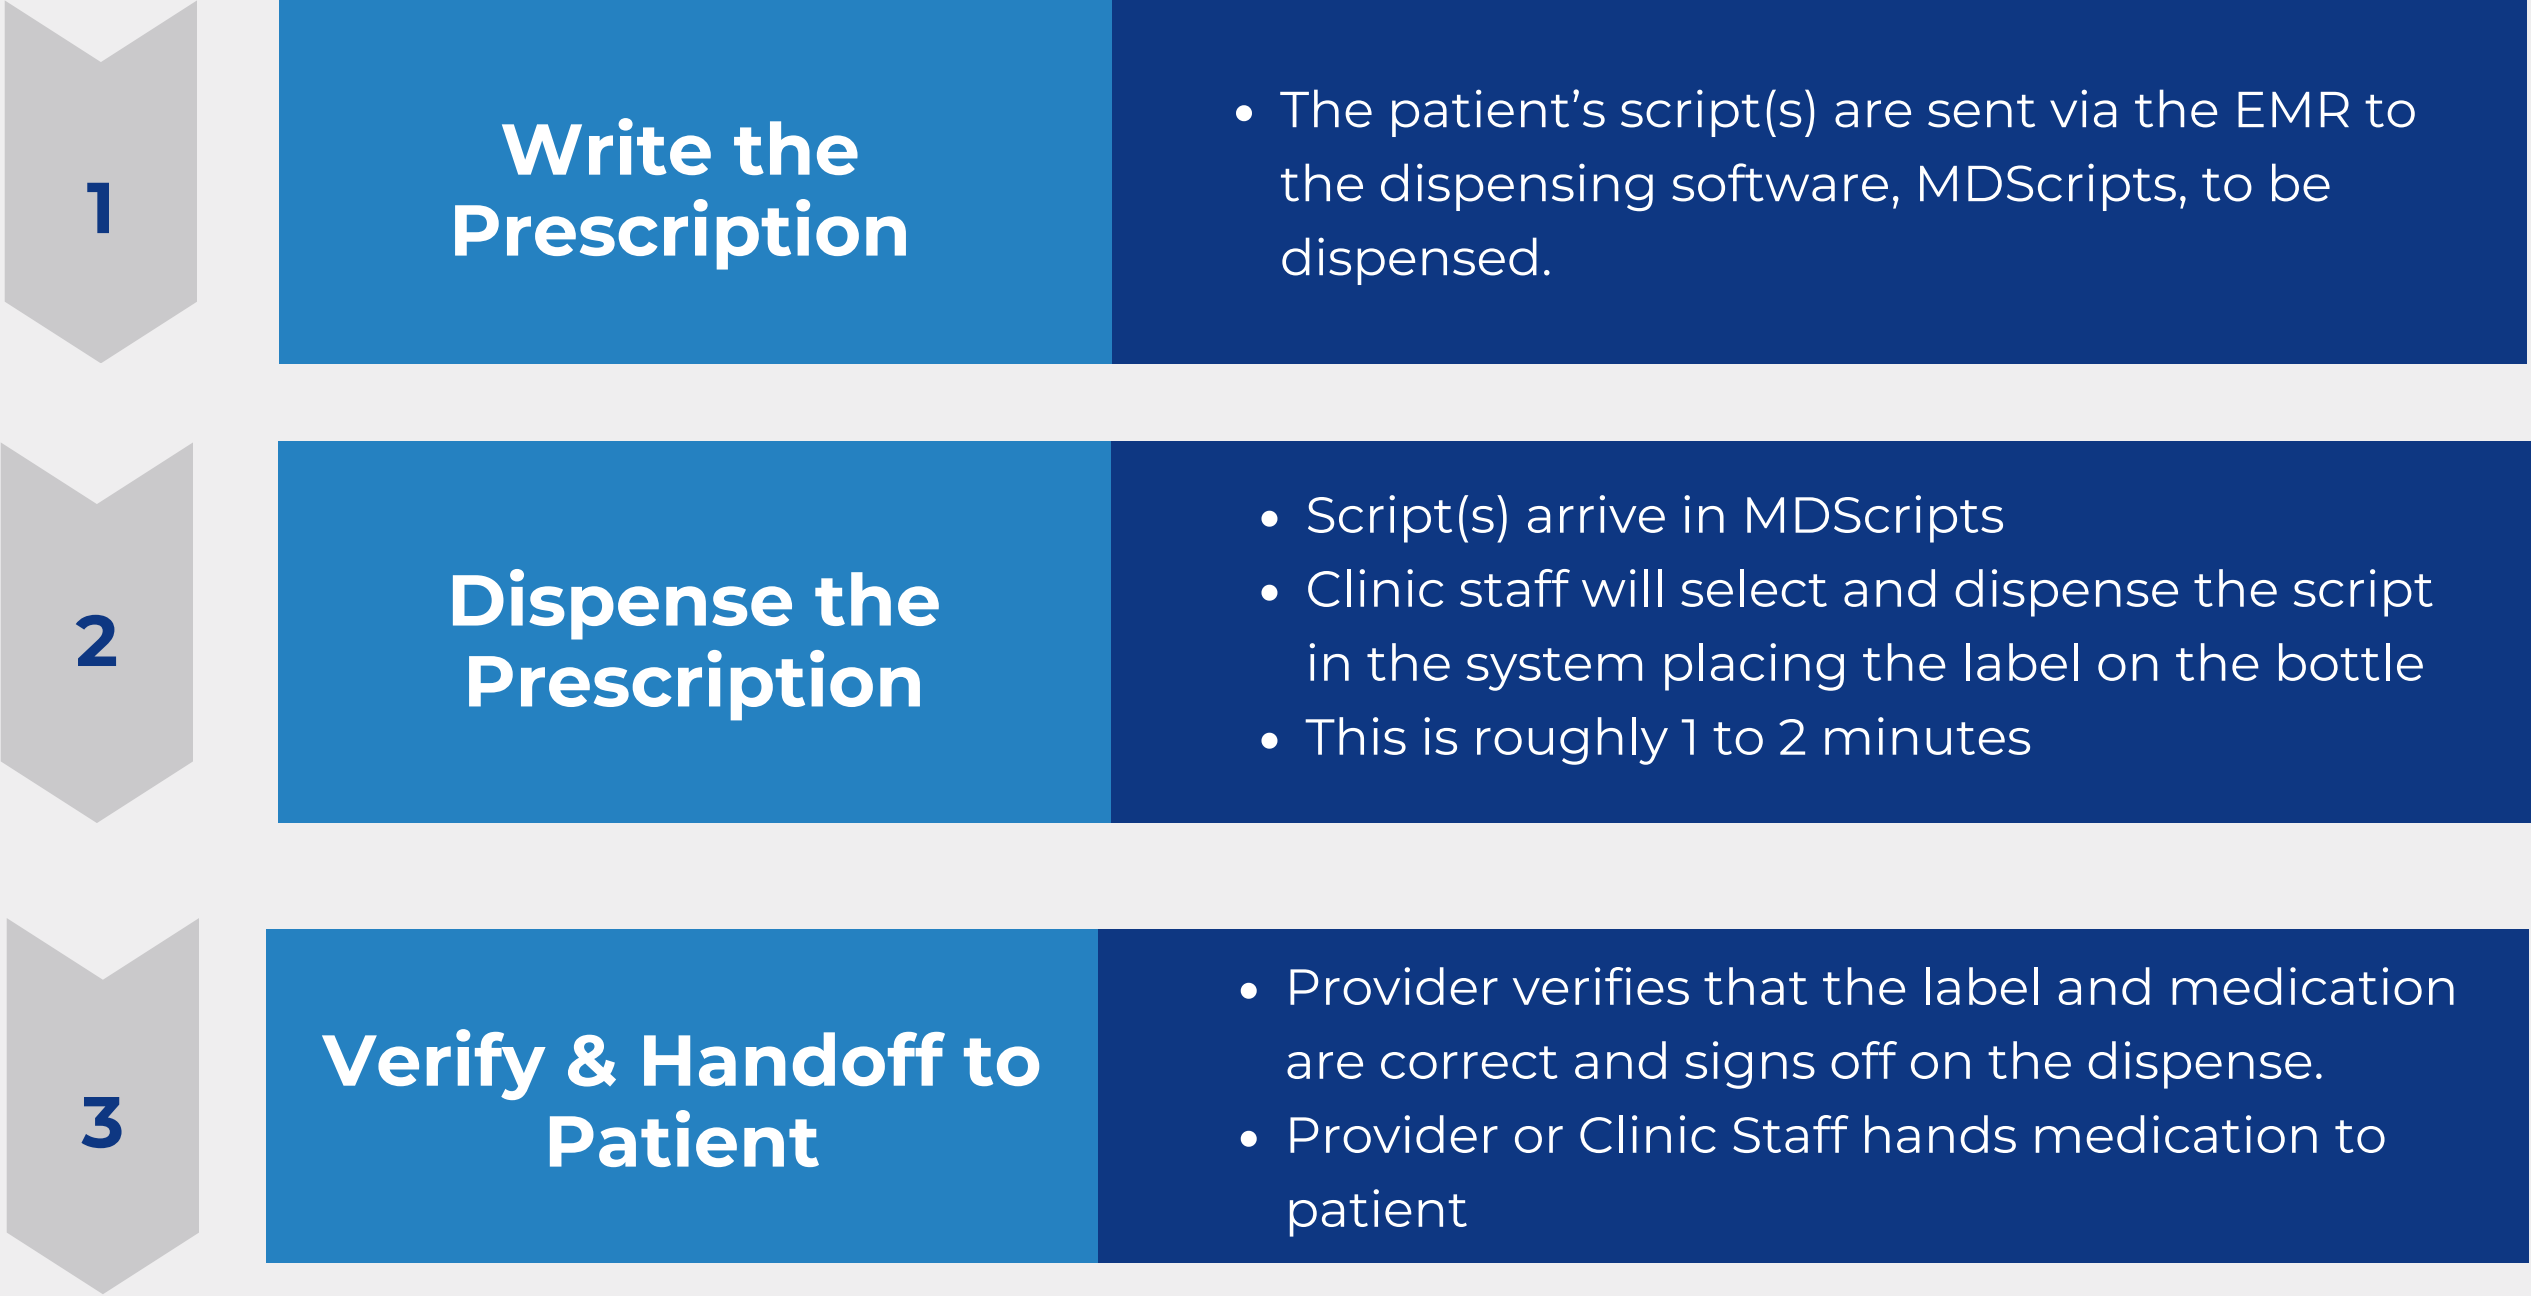

Prepackaged Medications

Individually sealed, labeled doses minimize errors, simplify inventory management, and improve patient compliance through clear instructions.

- Minimal dispensing errors
- Streamlined inventory control
- Improved adherence tracking

Together, these solutions directly support practice goals of reducing hospital readmissions, preventing duplicative services, and improving quality scores.

Dispensing Workflow Overview

Driving Patient Engagement & Better Outcomes

Immediate Medication Initiation

Patients leave the office with medications in hand, increasing first-fill adherence rates by up to 30% and reducing refill abandonment compared to a traditional retail pharmacy.

Enhanced Patient Education

Point of care dispensing creates teachable moments where providers can directly counsel patients on proper medication use, side effects, and expected outcomes.

Empower Self-Management

Clear labeling and personal instruction empower patients to manage their conditions effectively, aligning with CMS emphasis on patient-centered cultures that improve both physical and emotional health.

These engagement improvements directly translate to better health outcomes, reduced emergency department visits, and higher patient satisfaction scores—all critical performance metrics.

Meeting CMS Quality Reporting Requirements - PDE

Medication Reconciliation

Supports accurate medication reconciliation—a key Clinical Quality Measure (CQM) for ACOs—by ensuring providers have complete visibility into what patients are actually taking.

eCQM Reporting

Enables precise tracking of medication adherence data for electronic Clinical Quality Measure (eCQM) reporting, reducing manual data collection burden and improving accuracy.

Care Coordination Integration

Seamlessly integrates with ACO care coordination workflows, providing real-time data that improves reporting quality while reducing administrative overhead for your teams.

Simplified Billing & Financial Integration

Straightforward Revenue Cycle

Our program integrates seamlessly with existing Medicare reimbursement frameworks, ensuring compliant billing while maximizing appropriate revenue capture.

Medicare Part D Framework

- 1 Billing operates within established Part D guidelines including PDEs with in-network payor contracts.

Documentation & Reporting Support

- 2 Integration of ASM's dispensing data with ACO reporting systems to align medication, adherence and utilization metrics with CMS performance requirements.

Value-Based Care Focus

- 3 Capture appropriate reimbursement while maintaining focus on quality outcomes and patient care—not administrative complexity.

Proven Impact: Case Studies & Metrics

15%

Reduced Readmissions

Example ACO partner achieved a 15% reduction in 30-day hospital readmissions within the first year of implementation.

20%

Improved Adherence

Medication adherence rates improved by 20%, directly contributing to quality score improvements and shared savings achievement.

28%

Higher Satisfaction

Patient satisfaction scores increased 28 percentage points due to convenience, enhanced education, and personalized care experience.

"In-clinic dispensing transformed our medication management process. We've seen measurable improvements in adherence, patient satisfaction, and our quality scores—all while simplifying our workflow."

– **Medical Director, Mid-Atlantic ACO Network**

Seamless Integration & Provider Support

Dedicated Onboarding

Comprehensive training for ACO providers and staff ensures smooth implementation with minimal disruption to existing workflows.

Real-Time Data Access

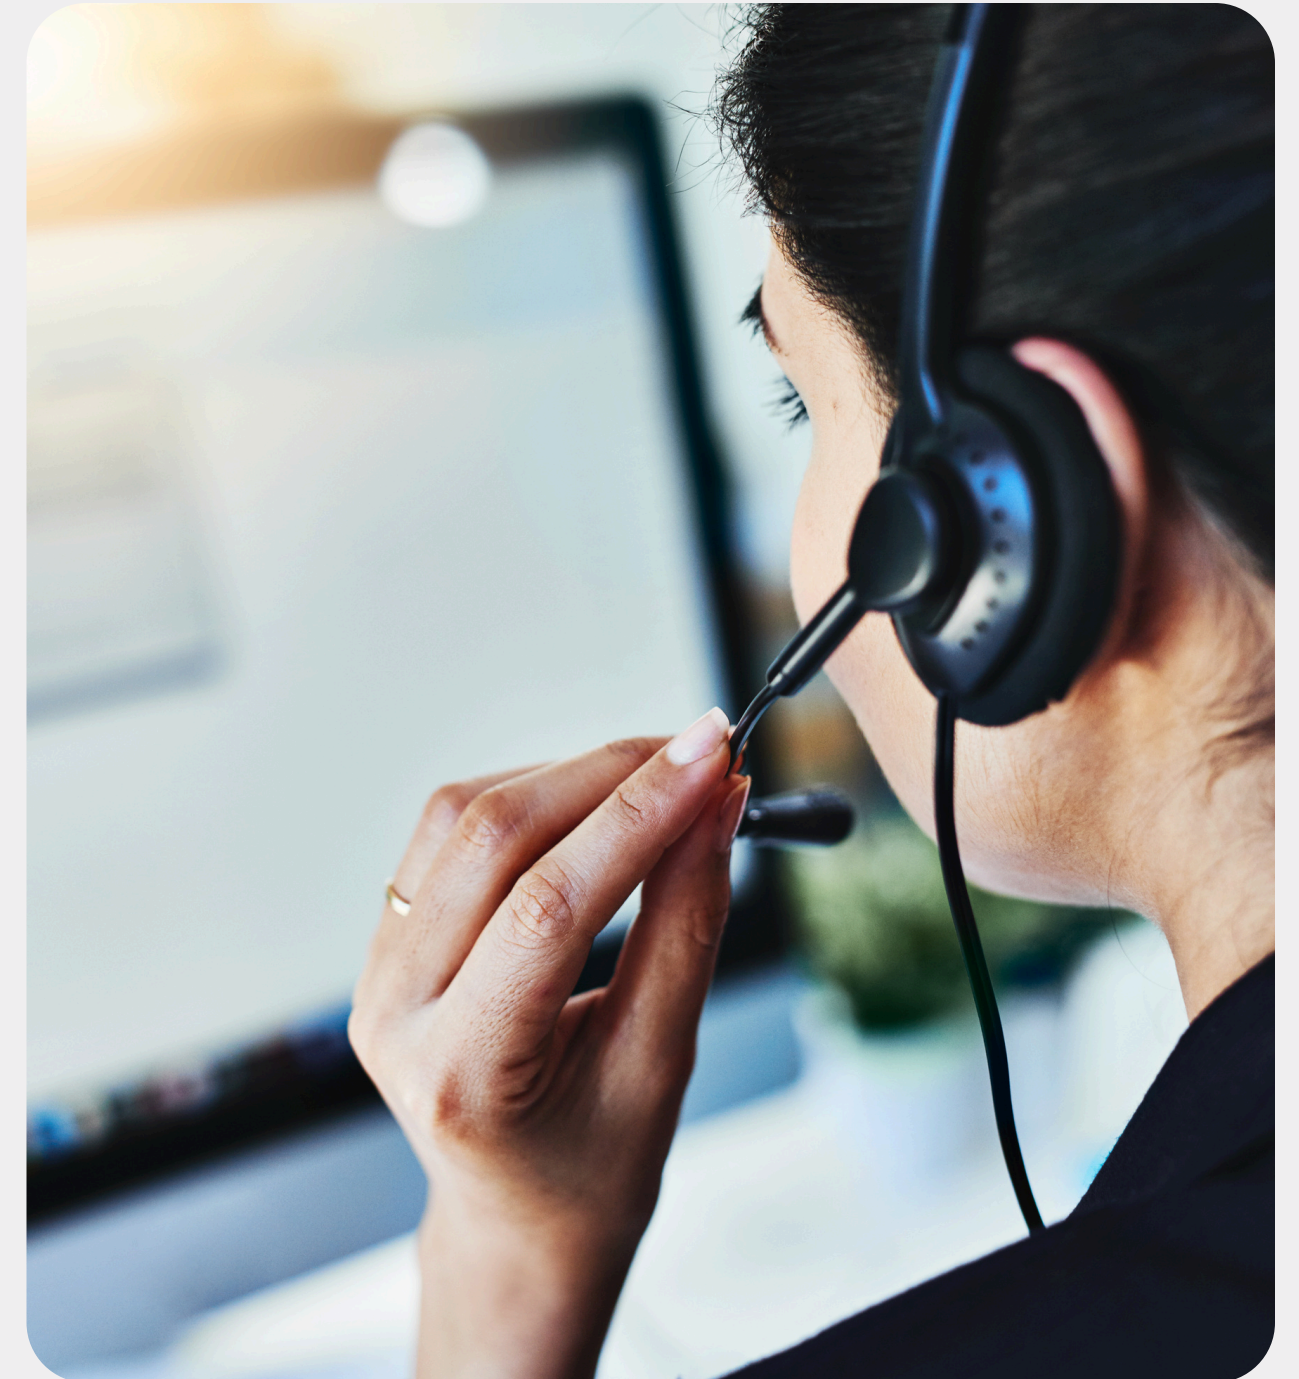

Secure portal provides instant visibility into inventory levels, dispensing patterns, and adherence metrics for data-driven decision making.

Ongoing Clinical Support

Continuous access to clinical experts who help optimize medication management protocols and patient counseling approaches.

Our implementation team partners with your ACO every step of the way, from initial setup through ongoing optimization, ensuring you maximize the value of in-clinic dispensing.

Why Partner With Us?

Human-Centered Design Alignment

Our solution directly supports CMS's human-centered design approach by enhancing both patient and provider experience through convenience, clarity, and coordination.

CMS Requirements Made Easier

Stay ahead of evolving CMS requirements for quality reporting, beneficiary engagement, and care coordination with tools designed specifically for ACO success.

Measurable ROI

Deliver proven clinical and financial benefits—improved outcomes, higher quality scores, and increased shared savings—with minimal operational disruption.

Let's Elevate Care Delivery Together

Empower Your Team

Give providers and patients the tools they need to succeed with convenient, integrated in-clinic dispensing solutions.

Achieve Quality Goals

Meet and exceed CMS quality benchmarks while maximizing your shared savings potential through improved outcomes.
